The Ripple Effect translates complex trauma concepts using metaphor, visual models, common language, and rich case example and shows: 1) the domains of functioning affected by trauma; 2) the mechanisms through which trauma affects development; and 3) intervention pathways. This workshop offers foundational trauma knowledge for providers learning about evidence-based trauma treatments and highlights ways to share trauma theory with family members and across systems (e.g. schools, child welfare workers, mental health, medical practitioners, police) as we work jointly to lessen the impact of trauma exposure.

This workshop presents an integrative framework for understanding and communicating across systems about how trauma can affect a child, a family, and a system. The framework was developed by Chandra Ghosh Ippen, Christopher Layne, and Bob Pynoos of the National Child Traumatic Stress Network (NCTSN) and is adapted from core trauma concepts identified and ratified by the NCTSN Core Curriculum on Childhood Trauma Task Force.

The Ripple Effect translates complex trauma concepts using metaphor, visual models, common language, and rich case example and shows: 1) the domains of functioning affected by trauma; 2) the mechanisms through which trauma affects development; and 3) intervention pathways. This workshop offers foundational trauma knowledge for providers learning about evidence-based trauma treatments and highlights ways to share trauma theory with family members and across systems (e.g. schools, child welfare workers, mental health, medical practitioners, police) as we work jointly to lessen the impact of trauma exposure.

Participants will:
- be able to name at least 3 domains of functioning that may be affected by trauma.
- be able to name two factors that may affect individual variability in response to a traumatic event.
- be able to name at least 2 core concepts related to the mechanism through which trauma affects development.
- use the framework to identify at least 3 ways in which their current practice currently addresses the core trauma concepts.
- use the framework to identify 2 ways in which they may make changes in practice to further address core concepts.
- be able to name two practice elements to enhance emotion regulation.
- become familiar with the C.O.P.E.S. framework.

CEUs are available for LCSWs, LMFTs, and LPCCs (more information on back page).
Chandra Ghosh Ippen, PhD, is the Associate Director of the Child Trauma Research Program at the University of California, San Francisco, the Director of Dissemination for Child-Parent Psychotherapy, and member of the Board of Directors of Zero to Three. She specializes in working with young children who have experienced trauma and has co-authored over 20 publications on trauma and diversity-informed practice, including the manual for Child-Parent Psychotherapy, the children’s story “Once I Was Very Very Scared,” and the Trinka and Sam story series. Dr. Ippen has over 14 years of experience conducting trainings nationally and internationally in diversity-informed practice and Child-Parent Psychotherapy.

She also has a lifetime mission to bake 1000 pies and a pie in all 50 states.

The Ripple Effect
An Integrative Framework for Enhancing Trauma-Informed Practice Across Systems

CPA OPD Provider Code: CHI001

The Child Trauma Research Program is approved by the CPA OPD to sponsor continuing professional education for psychologists. The California Board of Behavioral Sciences (BBS) now recognizes CPA continuing education credit for license renewal for LCSWs, LMFTs and LPCCs. CTRP maintains responsibility for this program and its contents.
