Bridges Out of Poverty
Strategies for Professionals and Communities

This 6-hour seminar provides a new lens to examine what a resourced (middle- and upper-class) and under-resourced (poverty) life looks like -- The aim is to create a relationship-based approach to service — to bring awareness and help others increase positive outcomes regarding success in school, work, and in the community.

This training is based on concepts in the book, Bridges Out of Poverty: Strategies for Professionals and Communities, that give insight on the differences between our basic economic classes and provide an understanding of the issues and strategies related to reducing poverty.

Participants in this training will be offered ideas to improve individual interactions as well as concrete tools to improve policies and practices in our organizations. With an enhanced awareness of how we treat and interact with each other, we will be able to thoughtfully consider how we teach, support, and engage with people in a manner that encourages healthier and more successful interactions.
